

Zebra Kiosk Print Station

Affordable, Off-the-Shelf Solution

Offer an easy-to-sell, off-the-shelf kiosk solution with the innovative, all-in-one Zebra Kiosk Print Station. The space-saving Zebra Kiosk Print Station's affordability means even small retail end customers can now enjoy the benefits of including self-service kiosks in their operation—including improved service, increased customer satisfaction, increased revenue and lower operational costs.

The innovative Zebra Kiosk Print Station accessory accommodates a reliable Zebra® TTP 2000™ series printer, a roll of genuine Zebra™ media and a compact kiosk computer with VESA 75/100 standard mounting to form a complete, affordable alternative to more complicated custom kiosks. Simply add software to complete the solution.

- Quick and Easy to Integrate—Integrates all the kiosk hardware components into an easy-to-install device that simply mounts to a wall or pole.
- Easy to Afford—Its low cost results in rapid ROI, so even smaller retailers can reap the benefits of self-service kiosks.
- Flexible Media Options—Supports reliable genuine Zebra media up to 6" roll, and widths of 2.3"/58 mm to 3.25"/82.5 mm.
- Durable and Secure—Sturdy, metal, lockable enclosure securely holds the printer and media, and a kiosk computer securely fastens to the unit—protecting all components from tampering and tough retail environments.
- Easy to Service—Enclosure opens completely to provide easy access for quick media changes and service.

Reliable TTP 2000 Series Kiosk Printer

The heart of the Kiosk Print Station is Zebra's rugged TTP 2000 direct thermal printer.

It provides unparalleled reliability for kiosks—with features like the guillotine cutter, jam-preventing looping presenter, and paper-low sensor option. And the Zebra Kiosk Print Station enclosure opens completely to allow easy access for quick media changes and service, minimizing downtime.
